

Progress Report #6

Team: Six

Project: [Goblin' Ghouls and Ghosts!](#)

Members: Jesse Vasquez, Jozef Gertz, Shane Kelley

Date: December 3rd, 2021

The Plan

We mainly planned to fine tune the program and debug it. In addition, we planned to make changes to the program using both the group's and the professor's observations. These things include fixing the HTML help file, revising the password recovery functionality, the resupply form, and having 3 levels of security.

The Work

Group Efforts:

- frmForgotPassword's design has been updated to accommodate the new capabilities.
- A confirmation code is sent to the user's email and is used to begin creating a new password.
- The HTML Help file now has more general information inside it to help a first time user sign up and make purchases.
- The resupply form now has fixed labels that make it have to do more with stock and make it less like a menu.
- Suppliers of products are now included in the database.

The Summary

The program is on the eve of packaging and deployment, the last thing is to include three levels of security and do some more debugging.
