

Progress Report #3

Team: Six

Project: [Goblin' Ghouls and Ghosts!](#)

Members: Jesse Vasquez, Jozef Gertz, Shane Kelley

Date: October 21th, 2021

The Plan

On October 9th, 2021, we held a group meeting and discussed the plan of action. Our plan was simple: continue expanding to our portions, adding functionality to them. In addition to that, we needed to start incorporating Crystal Reports and emails.

The Work

Jesse's Portion:

- Added new table - BillingInformation
 - Also added way for admin to access that table
- Only admins can access the tables
- The user now needs to verify their email
 - Program sends confirmation email to user's email address

Jozef's Portion:

- Password is now hidden with checkbox to toggle
- I added textboxes to receive input for Billing Information in sign up form
- I created the Crystal Reports for Customers, Staff, Products, and Online users tables.
 - Will do other tables when sample data is added

Shane's Portion:

- I added functionality to many parts of the products page, including filtering the menu items by their categories and adding items to the cart.
- I had some help from Jesse getting the cart working properly.
 - "Event wasn't connected" - Jesse
- I also rearranged the form and added an order summary that displays the number of items in the cart along with the total cost, as well as an option to dine-in or not.

The Summary

We are nearing completion of the base program and will have it at 90% completion in the next two weeks. During these two weeks, the only things we have determined to do was make the layout better, finish up the help file, and make it so that an administrator can use features that will be implemented along with Crystal Reports.
