

Progress Report #2

Team: Six

Project: [Goblin' Ghouls and Ghosts!](#)

Members: Jesse Vasquez, Jozef Gertz, Shane Kelley

Date: October 7th, 2021

The Plan

On September 24th, 2021, we met and determined that, with the skeleton done, we should continue to work on our own portions and make them fully dynamic and functional with the database.

The Work

Jesse's Portion:

- Added the means for a person with admin permissions to view the database.
- Administrators can now access any table in the database and insert, delete, and add from the database as needed.

Jozef's Portion:

- I wrote the functions in the ProgOps class that will send the SQL statements to the database to both create new users and will sign in users as well.
- I also assigned the appropriate code to the buttons to pass the information from TextBoxes to the ProgOps for the SQL Statements

Shane's Portion:

- I am working on adding database functionality to the Products form, as well as allowing the user to select items from the dataGridView and add them to the cart.
- The user will be able to select whether or not the items are for pickup or for dine-in. The program will be able to write the pricing information to the Transactions table in the database.

The Summary

Things are moving along nicely and we are on track to get the project to about 90% completion by the beginning of November.
