Progress Report #5
Team: Six
Project: [Gobblin' Ghouls and Ghosts!](#)
Members: Jesse Vasquez, Jozef Gertz, Shane Kelley
Date: November 18th, 2021

The Plan
Similar to last time, we have taken care of a lot of things that we had on the agenda. As such, the only things we had to implement was the HTML help file and some other things the professor informed us that we needed.

The Work
Group Efforts:
- Every single one of the Administrator forms for manipulating the database is fully functional, contains sample data, and is printable.
- The database now only accepts one email to be allowed in the database.
  - I.E. A user with sample@gmail.com cannot register that email if another user has registered with it already.
- Forms, buttons, and methods were created to handle a "Forgot Password" feature.
  - An email is sent to the user upon password change.

The Summary
Everyone has contributed to the completion of this project thus far, and the program is roughly 90% complete. The next steps are to debug and add more sample data for the sake of having more in the database. In addition, changes and adjustments will be made depending on observations from the professor and the team.
